◆ M18 Threaded Mounting!

The FXE Series sensors can simply be mounted by inserting it into an M18 opening. The sensor head has a threaded surface and an M18 locking nut is provided. This makes mounting this unit Easy and Fast!

Conventional mounting holes are also provided in the sensor body for added flexibility.

◆ BGS Sensing

The FXE-BGS sensors are distance settable and have Back Ground Suppression and the sensing is not influenced by Color or Texture of the sensing object. The same applies for the color changes in the background.

FXE-BGS

The FXE-BGS sensors come with a dual output. Hence the need for selection between Light ON/ Dark ON models is eliminated.
 The wire Black carries the Output NO/ Light ON.
 The wire White carries the Output NC/ Dark ON.

Sensitivity Adjustment

	<p>The adjuster is to be rotated in the clockwise direction to increase the sensitivity and thereby the sensing distance.</p>
	<p>The adjuster is to be rotated in the anti-clockwise direction to decrease the sensitivity and thereby the sensing distance.</p>

Note: The adjuster is a 4- turn endless pot

Mounting

Sensor can be mounted on an M18 cutout. The locking nut holds the unit in position.

Sensor can be mounted on bracket. Screw size M3 is to be used for mounting of sensor to the bracket*.

*: Bracket is not supplied along with unit.
