Difference you can see. High-definition model for superior high image quality and easier operation

Common Features for High-definition Model

High quality display improves screen readability and overall user experience. High image quality

Outstanding image quality!

Resolution is four times higher than before.

Standard displays [3.8 inch] 240 × 96 dots 2-gray scale
[4.6 inch] 320 × 120 dots 8-gray scale

New GT [GT703] 480 × 192 dots 64-gray scale
[GT704] 640 × 240 dots 64-gray scale

Capable of displaying 4 times the visible data on one single screen. Reduce screen hierarchy and simplify use. Optimized interface for easier operation

4 times visual performance

Data that previously required four screens can now be displayed on one.

Standard displays 320 × 120 dots

New GT 320 × 120 dots on a quarter screen

No need to switch screens!

Simplify screen hierarchy to improve operation efficiency. Reduce labor time lost to screen refreshing.

Standard displays Switching between four screens

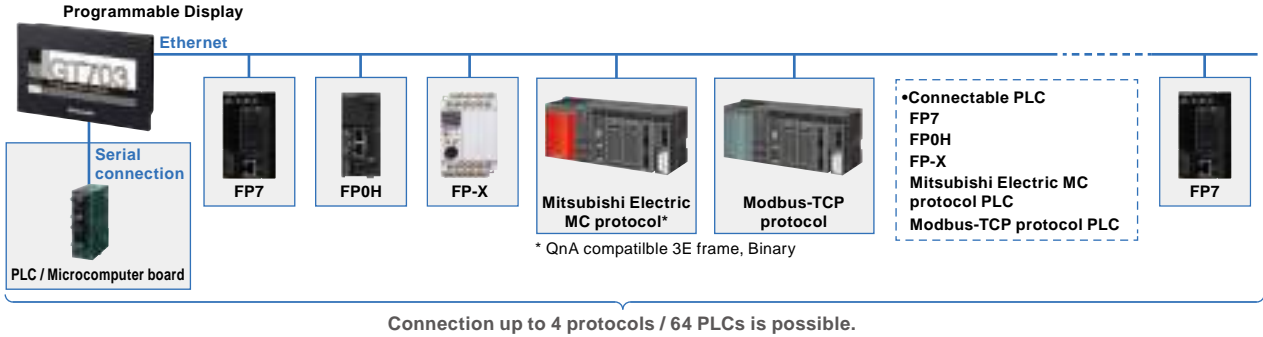

New GT Four screens displayed on a single screen

Connect up to 64 PLC units (our PLCs or other company's PLCs) via Ethernet

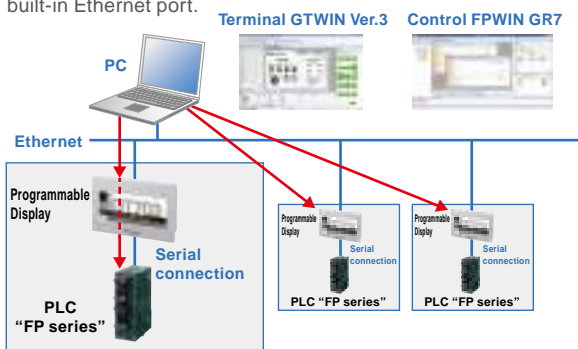

In addition to our PLC, Mitsubishi Electric MC protocol and Modbus-TCP protocol are also supported. Also with COM. port (serial connection), connection up to 4 protocols / 64 PLCs is possible.

Screens & PLC program can be edited via Ethernet. (pass through capability)

Multiple programmable displays and PLC units can be edited via Ethernet.

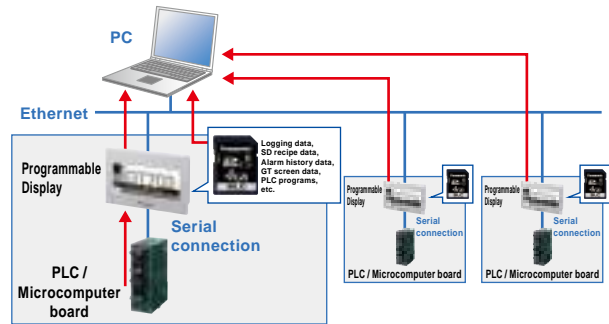

Besides being able to update the firmware and transfer screen data using GTWIN, it is now possible to use FPWIN to edit our "FP series" PLC programming directly through the programmable displays by using the built-in Ethernet port.

FTP(S) server function* to easily acquire data from SD memory card port. * Supports SSL / TLS.

Information from multiple devices can be linked to IoT.

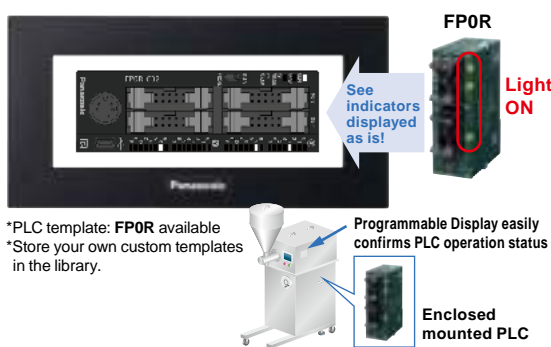

Information from SD memory card can be transferred to a single host PC via Ethernet.

Confirm PLC wiring and operation status simply and efficiently!

Whether the PLC is installed inside the equipment where it is not visible or in a remote location you can still monitor PLC input/output status

With simply drag and drop functionality, from PLC templates found in the parts library registered in GTWIN, you can easily verify the wiring and operation status.

Device monitor function shows PLC status without a PC

You can directly monitor multiple PLC devices from the programmable display without having to use a PC (FPWIN GR / FPWIN GR7). The device monitor can be accessed from the system menu, eliminating the need to create additional screens.

Battery free Data backup

By eliminating the battery routine equipment maintenance can be reduced. You can also turn off the power to save energy without hesitation.

GT **Tough** Model with Excellent Environmental Resistance

• The LCD picture on this page is simulated images.

- 20 to +60°C
-4 to +140°F

The wide operating temperature range allows for use in various environments.
 (-20 to +55 °C -4 to +131 °F when horizontally installed, vertically installed in a portrait orientation, upside down installed and when using battery.)
- UV Reduction

Resistant to UV Rays!
 The two-layer front protection sheet deduces UV rays in two-stage.
- IP67

High waterproof performance allows for use in environments exposed to splashing water.
 The front panel has a protective structure rated IP67.
- Low power consumption

Color type (GT03T-E): 3.1 W or less
Monochrome type (GT03M-E): 1.9 W or less

- Improved visibility

High visibility display even in bright environments!
 High in brightness and contrast and anti-glare coating provides exceptional viewing characteristics. Monochrome type uses a TFT LCD that's bright and uses deep black for great visibility.
- High-definition

Same resolution [320 (W) × 240 (H) dots] as the 5.7 inch model (GT32-E) **GT03-E**
 Screen data of **GT32-E** can be used on the smaller display.
- Smallest

The smallest class body among 3.5 inch screen **GT03-E**

See page 8 for details. ▶

Superior visibility even in sunlight

Color type

Tough model GT32T-E

Conventional model

Monochrome type

Tough model GT32M-E

Conventional model

- **High contrast TFT LCD:** Achieved higher contrast and visibility.
- **High brightness backlight:** Achieved greater brightness and visibility than the conventional model.

The monochrome type, in particular, is greater brightness than the conventional model and is way easier to view in bright environments thanks to the “deep black”.

Anti-glare, High visibility display

- **A front protection layer has an anti-glare coating to prevent unwanted reflections**
(Fingerprints are made less noticeable even in outdoor use)

Anti-glare front coating

No anti-glare front coating

Comparison of reflection

Tough model GT32T-E

Conventional model

No risk of product deterioration due to UV exposure

- The front sheet is made of a material that does not transmit UV rays.
- A combination of a UV cutting layer and a UV absorbing layer performs two-stage UV blocking.
The LCD and touch panel can be protected from deterioration.

UV ray transmittance performance

- The LCD images on this page are actual photographs.

Excellent water resistance

- The front panel has a protective structure rated IP67.
Safe to use outdoors or in a location exposed to splashing water.
- Added protection has been applied to the rear of the unit for a more rugged overall construction.

Wide operating temperature range

- Usable in a range of **-20 °C to +60 °C -4 °F to +140 °F**
(-20 °C to +55 °C -4 °F to +131 °F when horizontally installed, vertically installed in a portrait orientation, upside down installed) and when using battery.
- The TFT LCD can quickly switch screens even at a low temperature.
- The life of the LED backlight does not decrease even at a low power consumption.
- It is not necessary to prepare a heater for use at a low temperature.

Reduced power consumption

- Compact color type (GT03T-E): 3.1 W or less
- Compact monochrome type (GT03M-E): 1.9 W or less
- Color type (GT32T-E): 7.2 W or less
- Monochrome type (GT32M-E): 4.8 W or less

GT03-E

Tough

Programmable Display

The smallest class body among 3.5 inch screen

Color display uses 3.1 W or less for low power consumption!

Tough model

GT03T-E

GT03M-E

GT03T-E

3.5 inch, 4,096 colors TFT color LCD equipped with long life LED backlight

Built-in SD / SDHC memory card slot *1

Easy to copy, back up, and restore screen data.

*1: Class 10 compatible with a card of up to 32 GB.

GT03M-E

3.5 inch, 16-gray scale TFT monochrome LCD equipped with long life LED backlight

Through use of a TFT LCD with contrast ratio of 1,000 : 1, the "deep black" on a bright display means incredible visibility even in bright environments.

Common features

Superior visibility even in sunlight

The brightness and contrast ratio have been improved.

Wide range of operating temperature that covers outdoor use

The improved environmental resistance allows for use in a wider operating temperature range of -20 to +60 °C **-4 to +140 °F**.

UV resistant, anti-glare front panel

A front protection layer reduces the intensity of UV rays and has an anti-glare coating.

Impressive water resistance makes usage possible in areas prone to water contact.

The front panel is IP67 rated with added protection applied to the rear of the unit for a more rugged overall construction.

Integrated USB Interface

You can connect your PC and **GT03-E** using your USB cable to transfer screen data. When used with our **FP** series PLC, this display supports the pass through function, which allows simultaneous debugging of the PLC and the display.

GT32-E

SD Solutions only Panasonic can provide

Links and expansion via SD

As small-size touch panels have significantly improved their image quality, easy to read displays with sharp characters are no longer special features these days. Instead, programmable displays will evolve with maximum "user-friendliness" in various applications with PCs or other devices.

As shown below, our touch panels exchange and store data using SD memory card, data for many applications.

Industrial grade SD memory cards
Panasonic offers high-reliability industrial SD memory cards.

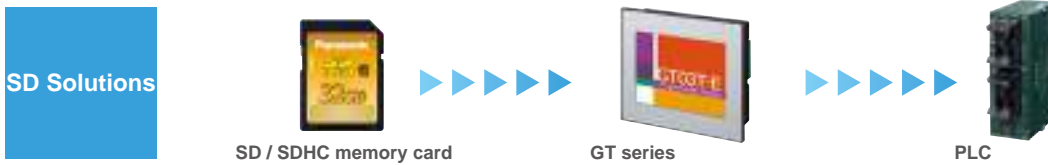

- Links via SD**
- ▶▶ SD recipe function (Data table management)
 - ▶▶ Transfer of PLC program data

- Expansion via SD**
- ▶▶ Saving alarm history data on an SD
 - ▶▶ Logging function
 - ▶▶ Display of graphs of stored data

PLC program transfer without the use of a PC

* Our FP series, excluding FP7.

It is possible to modify PLC ladder programs as well as the GT screen programs by using an SD / SDHC memory card. SD / SDHC memory card enables everyone to easily modify programs.

SD memory card data transfer function

Log and other data saved on a SD memory card inserted into the GT's onboard SD memory card slot can now be sent to a PC using a USB connection.

GT_SD_Reader software must be installed in order to read from the USB port. This software is installed simultaneously with Terminal GTWIN. For GT703 / GT704, data can be read from the Ethernet port using FTP client software on a PC. In order to do this, the FTP server function setting is required on the GT unit beforehand.

SD logging function to produce data “Visualization”

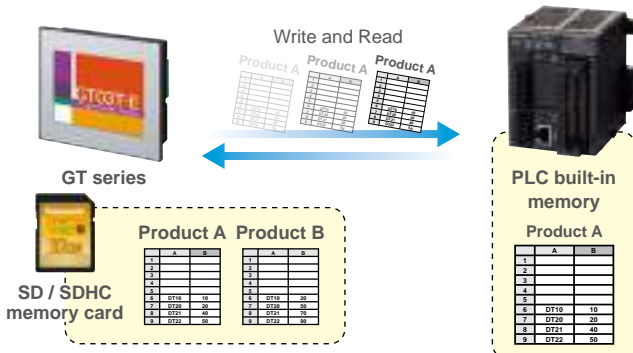

Capable of automatically collecting electrical power readings of Eco-POWER METERS and displaying them in a real time graph, allowing users to take quick actions for solutions.

- The GT unit can collect data, such as electrical power on an SD / SDHC memory card, and display the log data in a real time graph. You can make data “Visualization” without using a PC as a display or Data logger for collecting data.
- One bar graph has a maximum of eight bars and can be combined with line graphs.
- The following three conditions can be selected to trigger an operation to save log data.
 - (1) Specified time
 - (2) Specified cycle (1 sec. to 24 hrs.)
 - (3) Specified condition
- Large volumes of data can be saved on an SD / SDHC memory card, which can be carried with you.

SD recipe function

For high-mix production, recipe data up to 64 types and 4,096 devices in total, can be easily set on a PC. The created recipe data is saved on an SD / SDHC memory card, and the specified data can be written or read from a PLC.

Saving alarm history data on an SD / SDHC memory card

The alarm history data stored in the GT built-in memory can be saved on an SD / SDHC memory card, making it possible to easily control problems on a PC.

• The LCD images on this page are composites.

High Visibility and Excellent Operability

Three-color LED backlight allows for checking machine status at a glance

(GT02M / GT02G / GT703M / GT703G / GT05M / GT05G / GT12M / GT12G / GT704M / GT704G)

The monochrome display* has a three-color LED backlight. It allows operators to check the equipment status at a glance by changing the background color.

Example: green under normal conditions, orange during operation, and red in emergency situations.

* Excluding GT03M-E, GT32M-E, GT32M-R and GT02L

GT05G

(Normal)

GT12G

(In operation)

GT02G

(Emergency)

Highly flexible screen design!

GT series displays use an analog-touch panel where locations of parts and characters can be adjusted in increments of one dot. The adoption of the Windows® font has widened the character size selection (10 to 240 dots), making the screen design more flexible. *The maximum size varies depending on the model.

“Analog-touch design”

“TrueType fonts”

The adoption of the Windows® font has made it possible to choose a font focusing on the screen image and visual quality.

Graph function

One bar graph has a maximum of eight bars and can be combined with line graphs.

Flow display function

A flowing message of up to 64 characters (two-byte) can be displayed at the bottom of the screen. (128 messages)

Portrait display ideal for narrow spaces

The unit can display screens in portrait orientation and can therefore be installed in narrow spaces, expanding system design possibilities and contributing to size reduction. The portrait display is also ideal for slim equipment without enough space to install a display.

Multi-function switches

Multiple operations are possible. For example, screens can be switched by setting multiple values.

4,096-color parts libraries

(GT05S / GT32T-R / GT03T-E / GT32T-E)

3D-design buttons with higher visibility and operability are available.

• The LCD images on this page are composites.

Advanced Functions to Enhance Work Efficiency

FP monitoring function (FP2SH / FP0R / FP-Σ / FP-X / FP-X0 / FP-e)

*Excluding FP7

Five convenient features of GT series for improved compatibility with our FP series of PLCs

- 1 Device monitor (Display and change values of FP series devices. Three different modes available.)**
 - (1) Easy monitor mode: Use this mode when you want to monitor something. Display is continuous when one device is specified and the device can be changed.
 - (2) Entry monitor mode: Use this mode when you want to monitor multiple devices. You can register devices you want to display one-by-one and you can change them.
 - (3) Forced on / off mode: Use this mode feature to forcibly turn output on and off. You can set devices one-by-one for which you want to control output.
- 2 System register monitor (Display and change of system register values.)**
You can specify the system register number, display the value, and change it.
- 3 Shared memory monitor (Display shared memory values.)**
You can specify the slot number, bank number and address, and display the value. You cannot change the value.
- 4 Error monitor (Display an error occurring in the FP series PLC.)**
You can display the self-diagnostic result, error code and error flag, and you can even clear the error.
- 5 Password setting (Set the password to protect FP series program reading and writing functions.)**
Password registration and clearing is possible for the FP series password protection function.

Multiple GT displays can be connected to our FP series PLC. (RS-485 type)

GT link function

Up to 32 GT displays can be connected to one PLC unit without communication programs. The same screen operation is possible at a conveyor line or other remote locations, and the number of PLC units can be reduced, cutting the production process costs.

Notes: 1) As the number of connected units increases, the response slows down. Check the speed in the actual line.
2) The response time becomes relatively longer than those in the case of one-to-one connection. Please evaluate whether a sufficient performance can be obtained in designing the system.

Connectivity with multiple PLCs

Up to 31 PLC units can be connected to one GT unit. Progress in multiple production lines can be centrally monitored and controlled via one GT unit.

Notes: 1) This function cannot be used for a data link between PLCs.
2) The response time becomes relatively longer than those in the case of one-to-one connection. Please evaluate whether a sufficient performance can be obtained in designing the system.

Enhanced security with password protection

Password protection and operation security functions protect the data asset in the display unit and control the authorization for operation.

Password protection function

The screen data upload operation can be restricted by using passwords to protect the data asset in the display unit.

Operation security function

Up to 64 operators can set individual passwords, and up to 16 levels of restrictions can be set on displays and operations for each part. The registered users and passwords can be changed on the display unit.

High-efficiency operation with through function

This function allows operators to simultaneously carry out the transfer of screen data of a GT series display and the debugging of our FP series PLC connected to the display.

Easy-to-switch language

Conventionally, screens were created for each language. With this new language switching function, data can be registered in multiple languages (up to 16) for each part. The characters can be easily edited with Microsoft® Excel® and then imported.

	Japanese	English	Simplified Chinese	Traditional Chinese	Korean
000 SW0	日本語	English	简体中文	繁體中文	한국어
000 SW0	2024/2/20 20:20	Thank you	谢谢	謝謝	고맙습니다
000 SW1	1	1	1	1	1
000 SW1	2	2	2	2	2

Write device function

This function modifies the PLC data or turns bits on / off according to the PLC status or the screen No. Now four arithmetic operations between devices are also possible.

SD / SDHC memory card slot as equipment*1

AIG02MQ2*D and AIG02GQ2*D are equipped with an SD / SDHC memory card slot. Easy to copy, back up, and restore screen data.

*1: Class 10 compatible with a card of up to 32 GB.

To PLC
FP series PLC connection cable AIGT8162 and AIGT8142

miniUSB port

To PC

SD memory card slot

MiniUSB interface as standard equipment

Supports the through function using a USB cable, allowing simultaneous debugging of PLC and GT.

Flexible sizing and layout available for switches and characters

Switches of a minimum of 8 × 8 dots can be moved in increments of one dot. A wide range of character fonts and sizes (10 to 96 dots) are supported.

Equipped with IP67-rated body and newly designed bracket

Portrait orientation ideal for narrow spaces

Installation in narrow spaces is possible, enhancing the degree of system design freedom.

Application example: Water purifier

* The panel face protection sheet for the GT series is available as an option.

GT12

Programmable Display

Slim body equipped with a 4.6 inch half-QVGA LCD
The highest visual quality in its class

4.6 inch  

General-purpose model

Pure black

GT12M

Hairline silver

GT12G

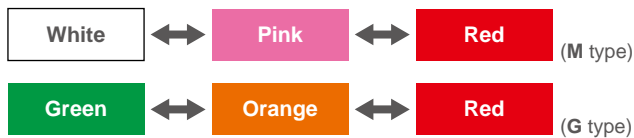

4.6 inch TFT high-contrast monochrome half-QVGA LCD with a wide viewing angle provides top-level viewability^{*1}.

High-definition half-QVGA (320 × 120) LCD produces crisp images. The analog touch screen technology does not display any annoying visible dots or lines.

^{*1}: The display has been changed STN LCD to TFT LCD from production in November 2016.

Bright three-color LED backlight indicates the equipment status.

The color combination is white / pink / red or green / orange / red. The backlight ensures both operability and visibility.

SD / SDHC memory card slot as equipment^{*2}

AIG12MQ1*D and AIG12GQ1*D are equipped with an SD / SDHC memory card slot. Easy to copy, back up, and restore screen data.

^{*2}: Class 10 compatible with a card of up to 32 GB.

MiniUSB interface as standard equipment

Supports the through function using a USB cable, allowing simultaneous debugging of PLC and GT.

Flexible sizing and layout available for switches and characters

Switches of a minimum of 8 × 8 dots can be moved in increments of one dot. A wide range of character fonts and sizes (10 to 120 dots) are supported.

Transformer-isolated power supply

The isolated power supply enhances the reliability.

Equipped with IP67-rated body

Portrait orientation ideal for narrow spaces

Installation in narrow spaces is possible, enhancing the degree of system design freedom.

Application example:
Business dishwasher

^{*} The panel face protection sheet for the GT series is available as an option.

GT05

Programmable Display

Compact size and equipped with a QVGA LCD

Both the color and monochrome types display striking images

3.5 inch

General-purpose model

Pure black

GT05M

Hairline silver

GT05G

Pure black

GT05S

92.2 mm
3.630 in

110 mm
4.331 in

GT05M: red

GT05M: pink

GT05G: orange

GT05G: red

GT05M / GT05G

3.5 inch TFT high-contrast monochrome QVGA LCD with a wide viewing angle^{*1}

^{*1}: The display has been changed STN LCD to TFT LCD from production in March 2016.

Bright LED backlight adopted

GT05M displays screens in white, red, and pink, and GT05G in green, orange, and red, ensuring both operability and visibility.

Common features

SD / SDHC memory card slot as standard equipment^{*3}

Easy to copy, back up, and restore screen data.

^{*3}: Class 10 compatible with a card of up to 32 GB.

USB interface as standard equipment

Supports the through function using a USB cable, allowing simultaneous debugging of PLC and GT.

Characters of a 240 dots maximum size can be displayed.

Capable of displaying several fine 10-dot characters or one 240 dots character in full screen.

Transformer-isolated power supply

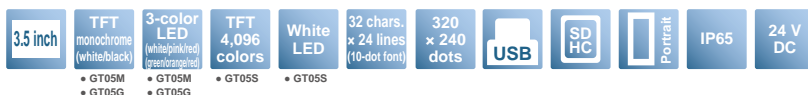

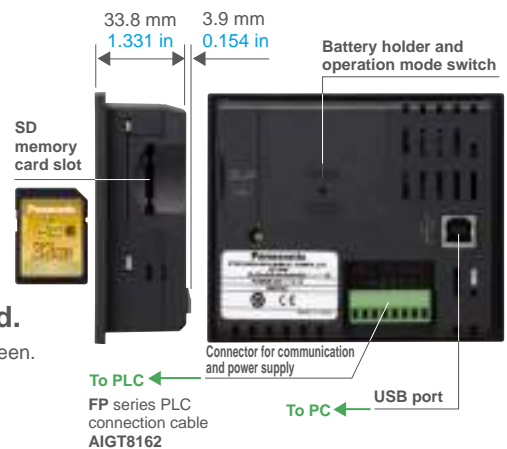

The isolated power supply enhances the reliability.

GT05S

3.5 inch TFT 4,096 colors QVGA LCD with a wide viewing angle^{*2}

^{*2}: The display has been changed STN LCD to TFT LCD from production in December 2011.

Bright LED backlight adopted

^{*}The panel face protection sheet for the GT series is available as an option.

GT32-R

Programmable Display

GT32M/T now with improved performance!

5.7 inch

General-purpose model

Pure black

GT32T-R

GT32T-R

Hairline silver

GT32M-R

163.2 mm
6.425 in

128.8 mm
5.071 in

5.7 inch, 4,096 colors TFT color LCD equipped with long life LED backlight

Great visibility even in bright environments is possible thanks to use of a TFT LCD with contrast ratio of 500 : 1.

GT32M-R

5.7 inch, 16-gray scale TFT monochrome LCD equipped with long life LED backlight

Through use of a TFT LCD with contrast ratio of 400 : 1, the "deep black" on a bright display means incredible visibility even in bright environments.

Common features

Slim frame and body

Designed for easy installation with slim frame and body compared to LCD.

Built-in SD / SDHC memory card slot *1

Easy to copy, back up, and restore screen data.
Data logging possible.

*1: Class 10 compatible with a card of up to 32 GB.

Integrated USB Interface

You can connect your PC and GT32-R using your USB cable to transfer screen data.

When used with our FP series PLC, this display supports the pass through function, which allows simultaneous debugging of the PLC and the display.

Transformer-isolated power supply

The isolated power supply enhances the reliability.

•GT32M-R •GT32T-R

• The panel face protection sheet for the GT series is available as an option.

Terminal GTWIN Ver.3

Screen Creation Tool for the GT series

Easier to use with upgraded user interface!

File manager window
Map format makes it easy to grasp the main and edit-in-progress screens. Switching to list or thumbnail format is possible. Display of all function trees such as configuration settings and logging can be switched using tabs.

Toolbar
Commonly used functions can be executed with the single click of an icon.

Part library window
Select library easily from dropdown menu. Verify ON / OFF status in the library window before pasting.

Search results and text string list window
Edit the screen while viewing device search results and text string list.

Screen edit window
Use drag and drop to create screen.

Part edit screen
Switch designs are also changed instantly. Just a single click can also change between switches and lamps.

*Some functions are not supported in GT series other than GT703 / GT704 / GT707.

Common to both GTWIN Ver. 2 and Ver. 3

Compatible with Windows® 8 / 8.1 / 10

(Also supports 64-bit version.)

Compatible with the nine languages for the menu

English

The menu can be indicated in Japanese, English, Simplified Chinese, Traditional Chinese (Note), Korean (Note), German (Note), Italian (Note), Spanish (Note) and French (Note).
Note: Ver.2 only

Japanese

Simplified Chinese

German

Screen copy in bitmap form

You can output screen images in bitmap form and use them in off-the-shelf applications. This is useful for preparing equipment operation manuals.

Simply drag-and-drop parts

You can easily create screens by just dragging parts from the library and dropping them anywhere you want.

Function to turn on / off the display of keyboard parts on the base screen

Indications of data parts in Japanese, Simplified Chinese, Traditional Chinese, and Korean

Now supports installation in a portrait orientation of all GT series models

Reduced site licensing fee and bother

The licensing fee and extra work that was involved in license (serial code) management have been greatly reduced.

WIN 2000 (Ver.2 only)	WIN XP (Ver.2 only)	WIN Vista	WIN 7	WIN 8	WIN 8.1	WIN 10	Required disk space 800 MB min.
--------------------------	------------------------	-----------	-------	-------	---------	--------	---------------------------------

* The 64-bit version is not supported except for Windows® 10, Windows® 8.1, Windows® 8 or Windows® 7.
* Windows is registered trademark or trademark of Microsoft Corporation in the United States and other countries.

*1: PLCs other than our FP series may be limited in the type of device that can be used and addresses. Please see manual for details.
*2: Communication may not be possible when using RS-485 depending on the sending and receiving timing with the other device.
*3: We cannot specify what other device you should use; therefore, please test it using the actual equipment before using.
*4: Available for models equipped with on RS-232C port.
○: Direct connection is possible to the CPU unit of the PLC.
○: Connection is possible using the communications unit or a signal conversion cable, etc.
(Example: The QJ71C24N or QJ71C24N-R2 calculator link unit is required when using the Mitsubishi Q Series.)
x: Connection is not possible
Blank: Not evaluated.
Refer to the HELP of the latest version of tool software "Terminal GTWIN", or GT series Connection with other companies' PLC's Manual for more details such as usable devices and addresses. Information on how to connect our programmable display and PLC is available. The manual can be downloaded from our website.

Cables | PLC connection cable

Power supply and communication port	Connection cable		PLC
5 V DC RS-232C		 Part No.: AIGT8142 ^{*1} PLC connection cable (2 m 6.562 ft) 5-pin mini DIN connector — 4 single wires + shielding wire	Our FP series (except FP7) ^{*2}
5 V DC RS-422 / RS-485		 Part No.: AIGT8152 ^{*1} PLC connection cable (2 m 6.562 ft) 8-pin mini DIN connector — 6 single wires + shielding wire	Mitsubishi Electric FX series
24 V DC RS-232C		 Part No.: AIGT8162 PLC connection cable (2 m 6.562 ft) 5-pin mini DIN connector — 3 single wires + shielding wire AIGT8165 (5 m 16.404 ft) and AIGT8160 (10 m 32.808 ft) are also available.	Our FP series (except FP7) ^{*2}
24 V DC RS-232C		 Part No.: AFC8503 For GT707 , PLC connection cable (L type: 3 m 9.843 ft) 9-pin D-SUB connector — 5-pin mini DIN connector	Our FP series (except FP7) ^{*3}
24 V DC RS-232C		 Part No.: AFC8503S For GT707 , PLC connection cable (straight type: 3 m 9.843 ft) 9-pin D-SUB connector — 5-pin mini DIN connector	Our FP series (except FP7) ^{*3}
24 V DC RS-422 / RS-485		 Part No.: AIGT8175 PLC connection cable (5 m 16.4 ft) 8-pin mini DIN connector — 4 single wires + shielding wire	Mitsubishi Electric FX series
24 V DC RS-232C		 Part No.: AIP81842 PLC connection cable (2 m 6.562 ft) 9-pin D-SUB connector — 6 single wires	FP2 / FP2SH COM port, CCU (Computer Communication Unit)

*1: This cable is exclusively designed for the GT series (5 V DC) and is powered by PLC.

*2: For FP7 series, please use a commercially available discrete wire cable.

*3: For FP7 series, please use commercially available D-SUB 9-pin (female) connector cable with discrete wire.

Options

■ **Panel face protection sheets**
10 sheets in a set (option)

For GT02L / GT02 / GT703	Part No.: AIG02800
For GT05	Part No.: AIG05800
For GT12 / GT704	Part No.: AIG12800
For GT32-R	Part No.: AIG32800
For GT707	Part No.: AIG7A07S01

■ **Waterproof packing**
Waterproof packing (for replacement), 10 pieces in a set
Package includes one piece.

For GT02L / GT02 / GT703	Part No.: AIG02810
For GT03-E	Part No.: AIG03810E
For GT05	Part No.: AIG05810
For GT12 / GT704	Part No.: AIG12810
For GT32-R/E	Part No.: AIG32810E

* The waterproof packing for GT02(L) is different from the GT02L main unit accessory.

■ **GT02 / GT02L / GT703 / GT03-E / GT12 / GT704 mounting parts**
5 sets of mounting parts (4 parts / set)
Package includes one set.

Part No.: AIG12830

■ **GT05 / GT32-R / GT32-E mounting parts**
5 sets of mounting parts (2 parts / set)
Package includes one set.

Part No.: AIGT28321 For GT05
Part No.: AIG32830 For GT32-R/E

■ **Spare connector**
5 connectors for communication and power supply in a set
Package includes one set.

Part No.: AIGT084

■ **GT02 / GT703 / GT03-E / GT05 / GT12 / GT704 / GT32-R / GT32-E backup battery**

Part No.: AFPX-BATT

■ **GT707 backup battery**

Part No.: AFPABAT001

CE marking directive compliance		EMC Directive, RoHS Directive							
Power supply		24 V DC							
Operating voltage range		21.6 to 26.4 V DC							
Power consumption		1.9 W or less		3.1 W or less		4.8 W or less		7.2 W or less	
Power supply unit isolation method						Transformer isolation			
Ambient temperature		-20 to +60 °C -4 to +140 °F (Note 1)							
Ambient humidity		10 to 90 % RH (at +25 °C +77 °F), (No dew condensation allowed)							
Storage temperature		-20 to +60 °C -4 to +140 °F							
Storage humidity		10 to 90 % RH (at +25 °C +77 °F), (No dew condensation allowed)							
Vibration resistance		5 to 8.4 Hz, amplitude 3.5 mm 0.138 in , 8.4 to 150 Hz, acceleration 9.8 m/s ² , 10 sweeps each in X, Y and Z directions (1 octave/min.)							
Shock resistance		147 m/s ² , 3 times in each of the X, Y and Z directions							
Superposed noise suppression		1,000 V [P-P] or more, pulse width of 50 ns, 1 μs between power supply terminals (by a noise simulator)							
Environmental resistance		IP67 (in the initial stages), Dust-proof and drip-proof from the front of the panel only (Rubber packing is attached to the panel contact surface.) (Note 2)							
Net weight		170 g approx.				470 g approx.			
Display	Display device	TFT monochrome LCD		TFT color LCD		TFT monochrome LCD		TFT color LCD	
	Resolution	320 (W) × 240 (H) dots							
	Display color	2 colors (black / white, 16-gray scale)		4,096 colors		2 colors (black / white, 16-gray scale)		4,096 colors	
	Displayable area	70.6 (W) × 52.9 (H) mm 2.780 (W) × 2.083 (H) in				115.2 (W) × 86.4 (H) mm 4.535 (W) × 3.402 (H) in			
	Backlight	White LED							
Functions	Font types	Fixed (GTWIN) : 1/4 width (8 × 8), half width (16 × 8), full width (16 × 16), Characters can be displayed in the 1, 2, 4, or 8 times width or height. True Type (GTWIN): 10 to 240 dots, Windows [®] : 10 to 240 dots							
	Languages	Japanese, English, Simplified Chinese, Traditional Chinese, Korean, German, Italian, Spanish, French, Turkish, Russian, Vietnamese							
	Graphics	Straight lines, Continuous straight lines, Squares, Circles, Ovals, Arcs, Elliptic arcs, Fan shapes, Elliptic fan shapes, Beveled squares, Bitmaps							
	Number of screens (Note 3)	230 screens approx.				180 screens approx.			
	Screen setting No.	Base screens: No. 0 to 3FF, Key board screens: No. 0 to 7, Login screens: No. 0 to F							
	Part functions	Messages, Lamps, Switches, Function switches, Data, Bar graphs, Clocks, Keyboards, Line graphs, Alarm list, Alarm history (Note 4), Custom parts (messages, lamps, switches)							
	Other functions	Recipe, Flow display, Write device, Multiple PLC connection, FP monitor, Language switching, GT link, Operation security, Data logging, SD recipe (Note 5)							
	Clock function	Displayed by referencing PLC clock		Provided with a built-in clock. (Can also refer to and display a PLC clock.) * Buy the backup battery (AFPX-BATT).					
	Backlight brightness adjustment	Can be set on the menu screen, via the GT configuration screen of GTWIN , or via PLC.							
	Contrast adjustment	Unnecessary							
	Buzzer	Installed							
	Automatic communication settings	The communication speed (baud rate) is automatically changed if there is no response from the target equipment.							
	Through function	GT connected between PC and PLC allows PLC to be debugged without a direct connection to a PC.							
Screen creation	Dedicated software should be used. Applicable OS: Windows [®] 2000 / XP / Vista / 7 / 8 / 8.1 / 10 (Note 6)								
Touch key resolution		Free layout (8 dots min.)							
Touch key operation force		0.8 N or less							
Touch key life		1 million operations or more (at +25 °C +77 °F)							
COM. port	Communication standard	Conforms to RS-232C	Conforms to RS-422 / RS-485	Conforms to RS-232C	Conforms to RS-422 / RS-485	Conforms to RS-232C	Conforms to RS-422 / RS-485	Conforms to RS-232C	Conforms to RS-422 / RS-485
	External communication conditions	Baud rate: 9,600 bps, 19,200 bps, 38,400 bps, 57,600 bps, 115,200 bps Data bits: 7 or 8 bits, Parity: None, Odd, Even, Stop bits: 1 bit							
	Protocol	Our FP series supported, General-purpose serial interface supported, and Other companies' PLC supported (Refer to the ' PLC COMPATIBILITY TABLE ' on p.23 for manufacturers and models.)							
	Connector	Connector terminal block (8 pins)							
Screen data transfer interface	Communication standard	USB1.1							
	Protocol	Our dedicated protocol							
	Connector	USB Mini-B				USB TYPE-B			
User's memory	Memory	F-ROM							
	Capacity	6 Mbyte				12 Mbyte			
Memory backup	Memory	SRAM							
	Backup battery	Lithium battery (replaceable) AFPX-BATT (Does not include with product.)							

Conformance to the UL / cUL standards

UL / cUL file No.	E96300
UL standard No.	UL508

- Notes: 1) Please use within a temperature range of - 20 to + 55 °C **- 4 to + 131 °F** when horizontally installed and vertically installed in a portrait orientation, upside down installed and when using battery.
 2) This protective structure condition applies to the front surface of the installed panel. This condition does not guarantee usage in all environments provided by users. When reattaching the panel, replace the waterproof packing.
 3) The number of screens that can be registered varies according to the registered contents.
 4) The alarm history function is not supported for the **GT03M-E**.
 5) The data logging and SD recipe functions are available with only models equipped with an SD / SDHC memory card slot.
 6) The 64-bit version is not supported except for Windows[®] 7 / 8 / 8.1 / 10. Windows is registered trademark of Microsoft Corporation in the United States and other countries.

	Languages	Japanese, English, Simplified Chinese, Traditional Chinese, Korean, German, Italian, Spanish, French, Turkish, Russian, Vietnamese					
	Graphics	Straight lines, Continuous straight lines, Squares, Circles, Ovals, Arcs, Elliptic arcs, Fan shapes, Elliptic fan shapes, Beveled squares, Bitmaps					
	Number of screens (Note 3)	2-gray scale: 250 screens approx. 8-gray scale: 200 screens approx.		180 screens approx.			
	Screen setting No.	No. 0 to 3FF		Base screens: No. 0 to 3FF, Key board screens: No. 0 to 7, Login screens: No. 0 to F			
	Part functions	Messages, Lamps, Switches, Function switches, Data, Bar graphs, Clocks, Keyboards, Line graphs, Alarm list, Alarm history, Custom parts (messages, lamps, switches)					
	Other functions	Recipe, Flow display, Write device, Multiple PLC connection, FP monitor, Language switching, GT link, Operation security, Data logging, SD recipe (Note 4)					
	Clock function	Provided with a built-in clock. (Can also refer to and display a PLC clock.) *Buy the backup battery (AFPX-BATT).					
	Contrast adjustment	Unnecessary					
	Buzzer	Installed					
	Automatic communication settings	The communication speed (baud rate) is automatically changed if there is no response from the target equipment.					
	Through function	GT connected between a PC and PLC allows the PLC to be debugged without a direct connection with the PC.					
Screen creation	Dedicated software should be used. Applicable OS: Windows® 2000 / XP / Vista / 7 / 8 / 8.1 / 10 (Note 5)						
Touch key resolution	Free layout (8 dots min.)						
Touch key operation force	0.8 N or less						
Touch key life	1 million operations or more (at +25 °C +77 °F)						
COM. port	Communication standard	Conforms to RS-232C	Conforms to RS-422 / RS-485	Conforms to RS-232C	Conforms to RS-422 / RS-485	Conforms to RS-232C	Conforms to RS-422 / RS-485
	External communication conditions	Baud rate: 9,600 bps, 19,200 bps, 38,400 bps, 57,600 bps, 115,200 bps Data bits: 7 or 8 bits, Parity: None, Odd, Even, Stop bits: 1 bit					
	Protocol	Our FP series supported, General-purpose serial interface supported, Other companies' PLC supported (Refer to the " PLC COMPATIBILITY TABLE " on p.23 for manufacturers and models.)					
	Connector	Connector terminal block (8 pins)					
Screen data transfer interface	Communication standard	USB1.1					
	Protocol	Our dedicated protocol					
	Connector	USB Mini-B			USB TYPE-B		
User's memory	Memory	F-ROM					
	Capacity	2 Mbyte		12 Mbyte			
Memory backup	Memory	SRAM					
	Backup battery	Lithium battery (replaceable) AFPX-BATT (Does not include with product.)					

Conformance to the UL / cUL standards

UL / cUL file No.	E96300
UL standard No.	UL508

- Notes: 1) This protective structure condition applies to the front surface of the installed panel. This condition does not guarantee usage in all environments provided by users. When reattaching the panel, replace the waterproof packing.
2) The display has been changed STN LCD to TFT LCD from production in November 2016.
3) The number of screens that can be registered varies according to the registered contents.
4) The data logging and SD recipe functions are available with only models equipped with an SD / SDHC memory card slot.
5) The 64-bit version is not supported except for Windows® 7 / 8 / 8.1 / 10. Windows is registered trademark of Microsoft Corporation in the United States and other countries.

The CAD data can be downloaded from our website.

Information on a program controller

Programmable Controller FP7

Automation Controls + Information
Panasonic PLCs also control information

- Use the Web server function to check accumulated data in the FP7 with a browser.

- Ethernet/IP* compatibility Easy connection with all kinds of robots and PLCs enables control and communication. *Ethernet/IP is a trademark of ODVA, Inc.
- Can be expanded with a cassette for serial communication and analog function. Reduces unit cost and footprint.
- Without the requirement of a power supply unit or backplane, you can reduce the cost and footprint of your PLC configuration.

Programmable Controller FP0H

NEW

Built-in dual Ethernet ports
Multiple interfaces that connect with various devices

- Up to 384 I/O points FP0H / FPΣ / FP0R units can be added.
- Use Ethernet to share data among controllers. Distributed control is possible for each control.
- With support for Ethernet/IP, Modbus-TCP and MC protocol, a variety of devices can be connected.
- Despite being super miniature, basic performance has greatly increased.
