

Conductive Plastic Potentiometric Position Transducers

KL Series with Return Spring

Special features

- very small dimensions
- 10×10^6 movements
- high resolution – better than 0.1 mm

Designed for measuring applications in limited space, the KL with return spring housing is only 13 mm wide.

Careful selection of the materials and high quality components used in KL with return spring potentiometers ensure consistent measurement and reliable operation throughout the service life of the sensor.

Special designs with better linearities are available on request.

Important

All values given for this series –
 including linearity, lifetime, micro-
 linearity, resistance to external dis-
 turbances and temperature coeffi-
 cient in voltage dividing mode –
 are quoted for the device operat-
 ing with the wiper voltage driving
 an operational amplifier working
 as a voltage follower where virtu-
 ally no load is applied to the wiper
 (I_e ≤ 1 μA).
